

CBT

(One Marks & Two Marks)

UNIT-I 1. Define CLR? 2. Expand ASP? 3. Write the features of visual studio.net? 4. Expand ADO. 5. What is ADO.Net? 6. Write the features of .Net framework? 7. Expand MSIL. 8. Define operator? 9. Define variable? 10. What is Structure? 11. Define ADO.Net? 12. Define Meta Data. 13. What is meant by managed code? 14. Define Array. 15. List the .Net Object. 16. Give the advantages of .Net Services. 17. Define class in C#? 18. Write the purpose of .Net Framework.	UNIT-II 1. List the mouse related events? 2. Define Events? 3. Write any 2 mouse events? 4. Difference between show() & Show dialog() method? 5. Expand MDI. 6. Differentiate label and textbox. 7. Differentiate Checkbox & Radiobutton. UNIT-III 1. Write the use of fill() method? 2. What is ADO.Net? 3. Compare Data reader & dataset? 4. List the methods in Dataset. 5. Write the use of Stored procedure? 6. Define stored procedure? 7. Write the features of ADO.Net? 8. Write the purpose of .Net Framework? 9. List the important properties of timer method. 10. What are the parts of ADO.NET?
UNIT-IV 1. What is Global.asax file? 2. Define IIS? 3. Write the list of window controls? 4. What is Web API? 5. Draw the life cycle block diagram of ASP.NET. 6. Define virtual Directory in IIS.	UNIT-V 1. What is XML? 2. Expand XML, DTD, HTML. 3. What are the building blocks of XML Schema? 4. What is XML Namespace? 5. What is XML Schema? 6. Write the step to create XML file? 7. What is Data Island? 8. What is Serialization?

CBT

12 & 6 Marks

<u>UNIT-I</u> 1. Explain Automatic memory management with neat diagram? 2. Explain Architecture of .Net Framework with neat Sketch? 3. Write the Short note on .Net object? 4. Explain array & its types? 5. Write the program using decision making statement? 6. Explain managed code and CLR. 7. Explain if then...else statement?	<u>UNIT -II</u> 1. Explain Toolbox Controls with examples? 2. Explain Advanced controls with examples? 3. How to create menu and context menu with examples? 4. Explain operator in c# with examples? 5. Explain how to create MDI application.
<u>UNIT-III</u> 1. Explain Architecture of ADO.Net with neat sketch? 2. Explain the features of ADO.Net.(6) 3. Explain .Net data providers? 4. How to access the data using dataset? 5. Write a program to read all records in a table using data reader.(6) 6. Explain Stored procedures? 7. Create your own stored procedure with 3 parameters to insert a record in a table.	<u>UNIT-IV</u> 1. How to add virtual directory in IIS? 2. Explain the types of Server controls? 3. How to change the home directory in IIS? 4. How will you add the controls in a web page?(6) 5. Explain any two rich controls in Asp.net.(6) 6. Write the short notes on Intrinsic controls?(6) 7. Write the short notes on Input Validation controls?(6) 8. How will you create server control with example.
<u>UNIT-V</u> 1. List out the advantages of XML?(6) 2. Difference between HTML and XML?(6) 3. How to declare entities and attributes in DTD? 4. Explain any 3 XML Components? 5. Explain SOAP building blocks ? 6. Explain XML Namespaces with examples? 7. Explain SOAP Fundamentals with examples?
